DATEurope

Vision & Mission

DATEurope is the European Industry Association for Digital Assistive Technology. Our vision is to enable access to digital assistive technology for all. The association represents the DAT industry with its developers, manufacturers, distributors, and service providers throughout Europe in the broadest geographical sense.

Our mission is to unite this diverse industry to influence legislation, raise awareness, and to achieve sustainability, growth, and commerce. The specific challenges within Europe, such as variations in language, funding systems, cultures and legislation has helped to grow our membership to more than 80 companies, from sole proprietors to large corporate organisations. Our membership continues to grow in both number and diversity.

DATEurope works together with stakeholders in digital assistive technology in Europe and around the globe. This strong network helps our members to achieve the vision of delivering outstanding technology and services to enhance the quality of life of persons with disabilities. DATEurope members have created and follow a Code of Conduct to ensure ethical growth and the sustainability of our industry.

DATForum 2025 - Paris

The event will explore the lessons learned from the last 25 years of access to Digital Technology and explores the implications of those lessons in a fast-changing technological and social landscape.

This event offers a unique opportunity to learn from industry leaders, share insights, and expand your professional network.

Accessibility

- *The Conference will be held in English but a live translation into French/english and English/french will be available*
- *The Venue is accessible to users of mobility aids and wheelchairs*
- *Captions and subtitles will be available on demand*

For any request/question feel free to contact our team manager at hello@incutec.fr
